EQ's Index: Dec. '65-Dec. '66

Titles

This index lists signed and unsigned articles that have been published in EQ from Dec., 1965, through Dec., 1966. Company affiliation is generally that of the time the article was written. Volume, number and date of issue, and page number are given.

A

Are Humidity-Temperature Tests Valid? F. C. Quinn, Hygrodynamics, Vol. 11, #4, Dec. 1965, p. 18.

ASTM O.K.s 2 Space Simulation Standards, Vol. 12, #3, Sept. 1966, p. 24.

ASTM: Work Proceeding on Space Simulation Standards, Vol 12, #1, March 1966, p. 36.

At AVS: New Ideas for Lower Pressure, Vol. 11, #4, Dec. 1965, p. 17.

C

CO_2 Cooling Can Be Economical, J. Robert Hafstrom, Hafstrom Technical Products, Inc., Vol. 12, #3, Sept. 1966, p. 40.

D

Distribute Carbon Dioxide Refrigerant through Uninsulated Lines—And Save!, J. Robert Hafstrom, Hafstrom Technical Products, Inc., and Vernon E. Benson, Arvin Bell Co., Vol. 11, #4, Dec. 1965, p. 22.

Down-to-Earth Environmental Engineering Operational Profiles (Post Scripts), Park W. Espenschade, Consultant: Part I—**Requirements,** Vol. 12, #4, Dec. 1966, p. 6.

Dynamic-Testing Sections of Apollo's Saturn, David R. Reese, Wyle Laboratories, Vol. 12, #4, Dec. 1966, p. 19.

E

E297: Calibrating Ionization Vacuum Gage Tubes, Vol. 12, #3, Sept. 1966, p. 24.

Electromagnetics and Sea Are 'In' (Around The Environs), Vol. 12, #2, June 1966, p. 10.

European Interest Pleases U.S. Equipment Manufacturers, Vol. 12, #4, Dec. 1966, p. 51.

F

First Decade and the Next, The (Path of The Environment), Part IV, Vol. 11, #4, Dec. 1965.

—**'Fortunately for This Old World,'** Charles F. Conrad, Thermotron, p. 42.

Flexibility in High Vacuum; Feedthrough 'Hands,' Vol. 12, #2, June 1966, p. 38.

G

'Gal' Yields Her Secrets—23 Years Later, Vol. 12, #2, June 1966, p. 26.

H

Honeywell Introduces 'Advanced, Lower Cost,' Multi-Purpose Magnetic Tape System, Vol. 12, #3, Sept. 1966, p. 44.

L

Lessons from Testing the Gemini Rendezvous Radar, Victor D. Marone, Westinghouse Defense and Space Center, Vol. 12, #2, June 1966, p. 16.

Letter to the Editor (Post Scripts), Robert E. Covey, Jet Propulsion Laboratory, Vol. 12, #4, Dec. 1966, p. 6.

Light on Compact Arc Lamps, Henry J. Koch and Otto E. Lienhard, Engelhard Hanovia, Vol. 12, #2, June 1966, p. 34.

Lockheed Is Finding Out What It's Like to Work on the Moon, Vol. 12, #4, Dec. 1966, p. 48.

Look at Vibration Analysis, A, James. H. Wise, Measurement Analysis Corporation, Part I, Vol. 12, #1, March 1966, p. 26; Part II, Vol. 12, #2, June 1966, p. 20.

M

Materials for Large Cryogenic Structures, Vol. 12, #1, March 1966, p. 25.

Mechanical Impedance, Robert E. Kerfoot, Spectral Dynamics: Part I—**Some Fundamentals,** Vol. 12, #3, Sept. 1966, p. 36; Part II —**A System that Works,** Vol. 12, #4, Dec. 1966, p. 36.

N

Needed: Down-to-Earth Engineering for Operational Profiles (Environment) (Post Scripts), Park W. Espenschade, Consultant, Vol. 12, #3, Sept. 1966, p. 10.

O

Organization, Men! (Post Scripts), Vol. 12, #3, Sept. 1966, p. 6.

P

Portable Variable-Size Environmental Room, A, T. K. Dehmel, IBM Kingston Products Test Laboratory, Vol. 12, #1, March 1966, p. 38.

R

Rucker Lifts Curtain on 'Electro-Fluid' Shaker, Vol. 12, #3, Sept. 1966, p. 34.

S

Saturn High Force Test Facility . . . At a Glance, The, Vol. 12, #4, Dec. 1966, p. 19.

Shaking a Heavier Load with No Other Means of Support, David D. Arnold, Ling Electronics, Vol. 11, #4, Dec. 1965, p. 46.

T

$3.5-Million High-Force Test Facility Joins The Environment, Vol. 12, #4, Dec. 1966, p. 18.

Two Manufacturers Announce Accelerometer Breakthroughs with 'Universal Elements,' Vol. 11, #4, Dec. 1965, p. 48.

U

U.S. Environment Going Abroad, Oct. 5-12, The, Vol. 12, #3, Sept. 1966, p. 16.

U.S. to Sponsor Show in Germany, Vol. 12, #2, June 1966, p. 56.

Authors

This index lists authors who have published in EQ from Dec., 1965, through Dec., 1966, with titles of their articles, month and year of appearance (e.g., 3/66 equals March, 1966), and page number. Co-authors are also given, and they appear, too, in a separate listing.

A

Arnold, David D., "Shaking a Heavier Load with No Other Means of Support," 12/65, p. 46.

B

Benson, Vernon E., and Hafstrom, J. Robert, "Distribute Carbon Dioxide Refrigerant through Uninsulated Lines—And Save!" 12/65, p. 22.

C

Conrad, Charles F., "The First Decades and Next: 'Fortunately for This Old World' " (Part IV), 12/65, p. 42.

Covey, Robert E., "Letter to the Editor," 12/66, p. 6.

D

Dehmel, T. K., "A Portable, Variable-Size Environmental Room," 3/66, p. 38.

E

Espenschade, Park W., "Down-to-Earth Environmental Engineering Operational Profiles: Requirements" (Part 1), 12/66, p. 6.

—"Needed: Down-to-Earth Engineering for Operational Profiles (Environment)," 9/66, p. 10.

H

Hafstrom, J. Robert, "CO_2 Cooling Can Be Economical," 9/66, p. 40.

—and Benson, Vernon E., "Distribute Carbon Dioxide Refrigerant through Uninsulated Lines—And Save!" 12/65, p. 22.

K

Kerfoot, Robert E., "Mechanical Impedance: Some Fundamentals" (Part I), 9/66, p. 36.

—"A System that Works" (Part II), 12/66, p. 36.

Koch, Henry J., and Lienhard, Otto E., "Light on Compact Arc Lamps," 6/66, p. 34.

L

Lienhard, Otto E., and Koch, Henry J., "Light on Compact Arc Lamps," 6/66, p. 34.

M

Marone, Victor D., "Lessons from Testing the Gemini Rendezvous Radar," 6/66, p. 16.

Q

Quinn, F. C., "Are Humidity-Temperature Tests Valid?" 12/65, p. 18.

R

Reese, David R., "Dynamic-Testing Sections of Apollo's Saturn," 12/66, p. 19.

W

Wise, James H., "A Look at Vibration Analysis," Part I, 3/66, p. 26; Part II, 6/66, p. 20.

Subjects

This is a comprehensive subject reference to EQ, exclusive of new products except where a product received more than routine attention. Date of the issue (e.g., 3/66 equals March, 1966) and page number are given.

A

ACCELERATION (See SIMULATOR).
ACCELEROMETER (See TRANSDUCER).
ACOUSTIC NOISE
—Reverberation room, 12/66, pp. 18, 19.
ANALYZER
Probability density, 6/66, p. 20.
—Spectrum, 3/66, p. 26.
ARC LAMP
—Compact, 6/66, p. 34.
ASTM, 3/66, p. 36; 9/66, p. 24.
AVS, 12/65, p. 17; 9/66, p. 12.

C

CARBON DIOXIDE
—Economical cooling methods, 9/66, p. 40.
—Vapor distribution system, 12/65 p. 22; 3/66, p. 12.
CHAMBERS (See SIMULATOR).
COLD WELD, 12/65, p. 14.
COMPUTER, 3/66, p. 26.
CRYOGENICS
—Structural materials, 3/66, p. 25.

D

DESIGN
—Cryogenic materials, 3/66, p. 25.
—Electro-fluid shaker, 9/66, p. 34.
—Environmental room, portable, 3/66, p. 38.
—Impedance measurement equipment, 12/66, p. 36.

E

ENVIRONMENTAL
—Arctic conditions, 6/66, p. 26.
—Education, 9/66, p. 10.

How to Use EQ's Three-Part Index

The index is in three parts: Title (including both signed and unsigned articles), Author and Subject. Each, of course, is alphabetical.

The TITLE index, with authors' names where applicable, is the most complete as to date, volume and number of the referenced issue, page, and author's company affiliation.

The AUTHOR index contains all published authors' names and the titles of their works. Date and page are also given; volume number and company affiliation can be ascertained quickly by checking the title index.

The SUBJECT index is the most extensive in terms of subject matter covered. Each reference gives date of the issue and page.

EQ's Index: Dec. '65-Dec. '66

Titles

This index lists signed and unsigned articles that have been published in EQ from Dec., 1965, through Dec., 1966. Company affiliation is generally that of the time the article was written. Volume, number and date of issue, and page number are given.

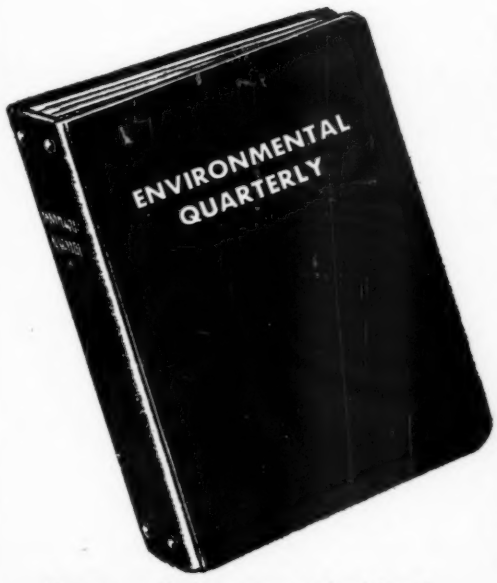
PRESERVE YOUR COPIES OF EQ

for convenience and easy reference . . . in this handsome, sturdy, HARD COVER BINDER



Easy to use. Simply remove a steel rod from the reinforced spine, place it in the center of the magazine and reinsert in slot.

- ***Holds 12 copies (3 years' issues)***
- ***Durable, vinyl covering***
- ***Specially Priced for Our Readers***
